Pana X
Pro-Series 21:9 Displays

- 21:9 10 bit panel with 5120 x 2160 (5K) resolution
- 120 Hz refresh rate for smooth scrolling
- Premium Touch and Non-Touch options
- Mini-LED backlight with >2,000 dim zones
- Quantum Dots enable DCI-P3/Rec.2020 support
- Up to 2000 nits peak luminance with true black
- VESA DisplayHDR1400/1000 certifications (pending)
- ADA-compliant low profile when wall mounted

Experience The Professional 21:9 Display Line

Pana X models comprise a range of sizes in thin-profile touch or non-touch 5K 120Hz LCDs with quantum dot Mini-LED backlights, each with optically bonded, tempered, anti-glare edge to edge glass, identical frameless design, identical back cover, identical display thickness, and identical port arrays across the entire line up. More sizes to come.

Our custom-engineered quantum-dot Mini-LED backlight offers more than 2,000 dim zones with proprietary algorithm in addition to 2,000 nits of peak luminance. The architecture was so complex that we had to design a driver board from the ground up. Pana X delivers visual quality that challenges high-end home TVs.

Ultra high peak luminance and true blacks
Experience ultra bright visuals fit for any indoor environment without the need for ambient light control.

5K at 120Hz
Butter-smooth scrolling graphics meet 5K razor sharp visuals. An unprecedented combination that forced us to develop a proprietary image processor and the first Jupiter PC Module accessory with discrete Nvidia Graphics.

State of the Art Interactive User Experience
Our new flagship Pana 105XT model utilizes FlatFrog’s best InGlass technology for the lowest latency and pin-point accuracy. Our new flagship Pana 81XT utilizes the latest metal-mesh capacitive touch bundled with a 3mm- tip Pen for precision writing.

Fully Secure Display
Pana displays do not carry an embedded (or hidden) operating system, such as Android. An on-board computer or system to drive the 5K display is not required. We designed our Pana line to meet the most stringent and uncompromising secure user environments in government and defense.

As an added option, we offer powerful (and convenient) video processing systems: either a slot-in Jupiter designed and engineered on-board computer (on back of Pana X), Windows or Android, that’s capable to drive 120Hz on our 5K display, or our compact CRS-5K processor that can splice up to 32 windows on a single Pana display while driving 5K, a Video Wall in a Box™.

### Display
- 21:9 aspect ratio, anti-glare, IPS LCD with a Mini-LED backlight comprising 2,304 independent dim zones, color enhancing Quantum Dot technology and FlatFrog InGlass touch with 20 simultaneous touch points.
- 21:9 aspect ratio, anti-glare, IPS LCD with a Mini-LED backlight comprising 2,048 independent dim zones, color enhancing Quantum Dot technology.

### Color Gamuts Supported
- Rec.709 / DCI-P3 / Rec.2020

### POWER
- **Input Current**
  - 100-240 VAC 60/50 Hz 12 Amp
  - 100-240 VAC 60/50 Hz 12 Amp
  - 100-240 VAC 60/50 Hz 12 Amp
